

Defence Components

Ground, Sea & Air

This comprehensive table outlines military-grade components, emphasising diverse applications across various platforms such as UAVs, aircraft, ground vehicles, ships, and missiles. Components like PEEK fasteners, sealing screws, and low head screws offer lightweight, corrosion-resistant, or space-saving fastening solutions. Others, including plungers, pins, and vibration isolators, enhance operability, rapid deployment, and system longevity. Grips, handles, latches, and hinges support user interaction and access, while actuators enable precise movement in mission-critical systems.

Application Selection Chart

- Wixroyd
- Automotion

- PEEK Fasteners
- Sealing Screws
- Captive Screws
- Low Head Screws
- Spring Plungers
- Index Plungers
- Quick Lift Pins
- Ball Lock Pins
- Grips
- Handles
- Hinges
- Latches & Locks
- Machine Mounts
- Cylinders
- Clevis Joints
- Linear Rails
- Lead & Ball Screws
