GAUGING & INSPECTION

### Material

Cone: thermoplastic.  
Stud: steel.

### Important Notes

For resting cylindrical or curved parts.  
Thermoplastic, offers non-marring attri-

bute.

Wixroyd's CMM fixturing system is designed for easy assembly and high repeatability, eliminating the need to build dedicated fixtures. The system offers a highly accurate and flexible solution of holding parts while probing on CMMs.

### Flexible

A variety of component parts as well as complete kits are available; to enable setup of fixtures in minutes.

- Aluminium base plates – hole based system with alpha-numeric labelling for easy set-up and recording of fixture positions.
- Fixture towers – ideal for fixturing of large vertical components.
- Soft-touch clamps – non-marking clamps providing the ideal force for holding parts during CMM probing.
- Locating components – rest pads, vee pads for cylindrical parts, pin rests etc.
