One-Touch Fastener - Ball Clamping
locating bush and receiver - safety release

Material
Body: steel, nickel plated.
Balls: stainless steel.

Technical Notes
One-touch fasteners are the ideal solution for applications requiring rapid and recurring change over of tooling or set ups. Use in applications as diverse as bottling processes, machine covers, changing of cogs and drive belts. One-touch fasteners provide a quick, simple and secure change over solution - no time waste in unfastening screws or other permanent fixings, and no opportunity for lost fixings in your machinery.

Temperature resistant to 180°C.

Important Notes
Suitable for panels/enclosures of 6 to 32 mm thickness. Use in conjunction with pin 33930.
Offers a safety release feature to prevent accidental release in or pin/assembly.

*Tensile strength stated is for locked position/state of the fastener.

Actuation:
Engage pin into receiver, a positive “click” is heard, securing balls are engaged. Panels are securely fastened.

To release, pull safety release housing on underside of receiver, balls are retracted and panel is released.
One-touch fasteners - alternatives to screws

Installation and removal of conveyor sub assemblies
Changes of star wheels and guide plates
Installation and removal of panels or covers
Change of shooters or production guides

Easy! Secure! For quick changeover with no tools!
One-touch change over

Installation and removal of rotary blades and changes of shooters

Changes of star wheels and guide plates

Changes of pusher and changes of chuck handling machines
