

Thrust Screws - Ball Ended

headless - flat faced ball - ribbed - metal

Thrust Screws

34044

THRUST SCREWS

Material

Body: steel, heat-treated, $1200 \pm 100 \text{ N/mm}^2$.

Ball: ball bearing steel, hardened.

Technical Notes

For clamping, tightening or supporting of

surfaces that are not exactly parallel.

Max. operating temperature 250°C .

Tips

Ball not secured against rotation. It is possible for the flat faced ball to flip and expose the spherical face of the ball. For

other types see following pages.

Order No.	Ball type	d_1	d_2	d_3	l_1	A/F	Static load kN max.	Weight g

Clamping, supporting and aligning non-parallel and uneven surfaces is greatly simplified with the use of Wixroyd self-aligning pads and thrust screws. Available with ridged faces for improved holding of cast components, or plastic faces for holding more delicate parts.

Self-aligning Thrust Screws

34000 to 34060 - Self-aligning thrust screws in sizes M6 to M24, ideal for clamping or supporting non-parallel surfaces.

Self-aligning Pads

34080 to 34121 - Self-aligning pads, both male and female mounting, ideal for accommodating variations between parts in fixtures.

Thrust Screws

34140 to 34160 - Thrust screws, with either brass or thermoplastic pads, are suitable for gentle clamping and positioning more delicate parts.
