

Palm Grips

cast iron - DIN 6335

Grips

70000

GRIPS

Material

Cast iron GG20, bright.

Technical Notes

Sandblasted or tumbled.

Tips

Grips with different bores or surface treatment can be made to order (min. quantity for specials 200 off).

70080

Material

Duroplast PF 31, black.
Grub screw: steel, galvanised or stainless steel A2.

Technical Notes

Produced to DIN 7708.
Special designs e.g. different lengths or grub screws in brass, or stainless steel can

be made to order depending on quantity.
Temperature range up to 110°C.

Order No.	Material	d ₁	d ₂	d ₇	h ₃	h ₄	l ₁	Weight g

Star Grips

solid stainless steel

Grips

70180

GRIPS

Material

Stainless steel 1.4305 (AISI 303), matt, dull blasted.

Technical Notes

Stainless steel star grips are a special

development intended for the food processing machinery industry. Large radii and smooth surfaces have been introduced to meet the highest hygienic demands.

70190

Material

Stainless steel AISI304
Blue gasket: silicone

Tips

Made to the high „3A“ standard.

This ensures it meets the high standards required for use in food, beverage, pharmaceutical and medical applications. Hygienically designed for effective and easy cleaning, corrosion resistant, non-

toxic.

Design precludes contamination by dirt, food particles and organic matter.

Star Grips with stainless steel grub screw

Grips

70610

GRIPS

Material

Grip: thermoplast (PA 6) Black RAL 9005.
Cap: thermoplast (PA 6)
Black RAL 9005, white RAL 9019, orange
RAL 2004, yellow RAL 1016, blue RAL

5015.

Threaded bush: stainless steel.

Technical Notes

Temperature range -30°C to +80°C.

Special types e.g. differing threads
available on request, subject to minimum
order quantity.

Torque Control Knob

Grips

72485

GRIPS

Material

Cap: thermoplastic PA 6, light grey, similar to RAL 7035

Torque mechanism: Steel, hardened.

Body: Aluminium, black anodised

Inner part: Steel, blackened

Technical Notes

The handle with intergrate torque

mechanism allows a defined torque during tightening. Reaching the torque results in a „over-looking“. For releasing the torque is transmitted indefinitely.

Three-lobed Torque Handles

Grips

with female thread

with screw

72490

GRIPS

Material

Screw: steel, blackened.

Cap: plastic, light grey.

Torque mechanism: steel, hardened.

Inner part: steel, blackened.

mechanism allows a defined torque limitation during tightening.

Reaching the torque results in an „over-locking“. For releasing the torque is transmitted indefinitely.

Reach: contains SVHC materials > 0,1% w/w.

Technical Notes

The handle with integrated torque

ROHS compliant.

Quarter Turn Screw, Male

stainless steel

37380

Material

Stainless steel 1.4404 (AISI 316), body
sintered, matte, shot-blasted. Screw:
stainless steel, 1.4301 (AISI 304), matte,

shot-blasted.

Technical Notes

These quarter turn screws are used to

develop higher clamping torques than is
possible with knurled handles.

73000

**Material**

Duroplast PF 31 DIN 7708, black.

Bush: steel, zinc-plated. 73000.W0116 has bush of brass.

Finish: polished, jointless.

Threaded bush type also available in red, subject to minimum quantity.

Technical Notes

Temperature range max. 110°C. Assembly

of taper bush model is through lightly tapping with a hammer, the knob will hold in position without need for cementing. Counter bore requires an h9 fit.

Pull Handles - 3A Standard

hygienic line, stainless steel

79760

PULL HANDLES

Material

Round bar stainless steel AISI304
Blue gasket: silicone

Tips

Made to the high „3A“ standard.

This ensures it meets the high standards required for use in food, beverage, pharmaceutical and medical applications. Hygienically designed for effective and easy cleaning, corrosion resistant, non-

toxic.

Design precludes contamination by dirt, food particles and organic matter.

79120

Material

Solid thermoplastic PA 6, glass ball reinforced. Matt black or orange with attractive, fine grain structure.

Technical Notes

Including hex screws DIN912 with suitable

nuts and washer. Solid plastic. Modern industrial design for the highest demands. Extremely resistant to torsion and easy to grip.

Minimum stress resistance >1000N. And scope of supply.

Including black galvanised cheese head screws (chromium VI free) with hexagon sockets DIN 912 and galvanised nuts DIN 934 with washers DIN 125.

Pull Handles - Heavy Duty aluminium

79200

PULL HANDLES

Material

Handle shank and grip: profiled aluminium
Al Mg Si 0,5. Connecting moulded
components made of black polyamide with
stainless steel pin.
Handle shank vibration ground and matte

finished. Grip

Technical Notes

Minimum stress resistance 1000N. Handle
with tangent bent aluminium shanks,
completely assembled.

Tips

For 19" front panels and appliances.
Provides high stability under load. Black
grips available on request.

PULL HANDLES

79240

Material

Handle shank: polyamide, PA 6 glass ball reinforced, black, semi-matt, with fine structure.

Connecting tube: aluminium ALMgSi 0.5, ground and anodized in natural colour or

with grooved plastic cover.

Technical Notes

Supplied with hex screws DIN 7991 M8 x 20, and suitable nuts and washers.

Minimum stress resistance 500N.

Tips

The handle shank is fitted with 4 clamping pins, when the connection tube is pressed in the pins form around the tube and provide a firm hold.

79500

Material

Profiled aluminium, with black polyamide end caps PA 6. Handle glass blasted and anodised, natural or black, satin finish.

Technical Notes

Two possible mounting options:

1) Mounting via screws (for panels

>2,5mm thick): two countersunk holes for DIN966, M4x8 included on model.

2) Mounting via rubber insert (for panels

1 to 2,5mm thick): additional rubber insert at top of the handle pushes in from the back, securing the handle. Minimum stress resistance 500N.

Tips

Mounting method:

- Make mounting cut-out in panel/material.
- Insert bottom rubber insert.
- Attach end caps.

- Press handle over lower edge of mounting cut-out at a 45° angle, ensuring correct position of rubber insert on the inside of the cut-out.

- If using additional rubber insert for mounting, hold handle against cut-out and fit insert. Alternatively use two countersunk screws with spacing equal to $l_1 - 40\text{mm}$ (as shown).

79520

PULL HANDLES

Material

Thermoplastic PA 6, glass bead reinforcement, fine-grain structure.
Threaded brass insert.

Technical Notes

Mounting: the front section is first set into

the mounting cut-out. The rear section is then fitted to front section from the interior of the panel, and fixed with three screws (supplied).
Minimum stress resistance 1000N.

Tips

This handle is suitable for different degrees of panel thickness 1 to 5mm. Its design guarantees that it fits securely at all times.

Order No.

79520.W0108
79520.W0109

Finish

Stone Grey
Light Grey
Greyish White

79522

Material

ABS resin, black, similar to RAL 9005, with fine structure on the visible surfaces.

Technical Notes

Flush inset handle for lifting and pulling. Unilateral, tool-less single-hole installation through self-locking, recessed handle.

Stress resistance: min. 400N when installed in 1,2mm sheet steel. Max. values depend on the strength of the mounting wall.

Tips

Assembly: place the trough inset handle in the cutout, so that the upper edge of the

cutout lies in the gap being the face of the handle. Then press the bottom edge of the handle into the cutout until it clearly locks into place.

Order No.	Panel thickness s mm

79540.W0218	Spring Return	Brushed	118

79550

Material

Pressure moulded aluminium, GD Al Si dCu 3.

Technical Notes

Snap-lock type-

with snap lock in both extended and retracted position.

Pull-back type-

with spring retraction from extended to retracted position.

Front or rear mounting possible. Natural finger profiling within the hinged handle. Can also be used for lifting in the retracted position.

Minimum stress resistance 500N.

Tips

Collapsible tray handles are of contemporary design and can be used wherever durability and styling are required.

Adjustable Clamping Levers

cast zinc, inner parts steel

Clamping Levers

74490

CLAMPING LEVERS

Material

Lever: Zinc die-cast, plastic coated, matt
Black - similar to RAL 9005
Silver - similar to RAL 9006
Inner: Steel, blackened
Cover: Plastic.

Technical Notes

By lifting up the lever, the serrations are disengaged and the handle can then be swung to any position. On releasing the serrations are automatically re-engaged.

Available with smooth bore.

Tips

Suitable for use in restricted areas due to low height and adjustable lever.

74494

Material

Lever: Zinc die-cast, plastic coated, matt

Black - similar to RAL 9005

Silver - similar to RAL 9006

Inner: Steel, blackened

Screw: Steel, blackened

Cover: Plastic.

Technical Notes

By lifting up the lever, the serrations are disengaged and the handle can then be swung to any position. On releasing the serrations are automatically re-engaged.

Screw part can be changed.

Tips

Suitable for use in restricted areas due to low height and adjustable lever.

Screw part can be changed.

Adjustable Clamping Levers

threaded bore, inner parts **stainless steel**

Clamping Levers

74440

CLAMPING LEVERS

Material

Handle: die-cast zinc,

- Orange RAL 2004

- Black RAL 9005

Inner parts: stainless steel 1,4305 (AISI 303).

Threaded part: stainless steel 1.4305.

(AISI 303).

Technical Notes

By lifting the lever, the serrations are disengaged. The handle can be positioned by the serrations, and the threaded insert can be exchanged. Upon releasing the

handle, the serrations are automatically re-engaged. The collar screw is torx head.

Tips

Suitable for medical and chemical industry applications.

74492

Material

Lever: Zinc die-cast, plastic coated, matt

Black - similar to RAL 9005

Silver - similar to RAL 9006

Inner: Stainless steel

Cover: Plastic.

Technical Notes

By lifting up the lever, the serrations are disengaged and the handle can then be swung to any position. On releasing the serrations are automatically re-engaged.

Available with smooth bore.

Tips

Suitable for use in restricted areas due to low height and adjustable lever.

74520

Material

Stainless steel no. 1.4305 (AISI 303), matt shot-blasted. Ball knob DIN 319, plastic black.

Technical Notes

Ideal whenever parts have to be clamped in

a confined space or a particular lever position is required. Pulling the lever, disengages the serrations allowing it to be swivelled to the ideal clamping position. On releasing the lever it will automatically re-engage.

74100

CLAMPING LEVERS

Material

Malleable iron, prepared and tumble finished. Contact faces machined.

Technical Notes

Clamping levers with double arms are robust. Applications are, for example, in

boiler making and special purpose machinery.

74470

Material

Lever: die-cast zinc.

Orange RAL 2004,

Black RAL 9005.

Inner parts: heat-treated steel, nitrided, black.

Threaded part: steel, nitrided, blackened.

Technical Notes

By lifting the lever, the serrations are

disengaged. The lever can be positioned by the serrations and the threaded insert can be exchanged. On releasing the lever, the serrations are automatically re-engaged. The collar screw is torx head.

Tips

Benefits of axial bearing:

- clamping force is 100% greater than when using standard levers (see graph).

- smaller clamping levers can be used due to the improved clamping force.

- considerably less force loss due to setting.

- no releasing due to vibration.

- no damage to clamped parts, due to axial action.

Adjustable Clamping Levers with axial bearing - threaded bore

Clamping Levers

70550

CLAMPING LEVERS

threaded blind

grub screw

Material

Grip: thermoplast (PA).
Inner part: heat-treated steel, nitrited black.
Screw: quality 8.8, blackened.

Technical Notes

Advantages of axial bearing:
- Double clamping force with same lever size, by reducing the surface friction.
- Protection of work piece by fixed locating

face.

- Little setting due to higher pre-clamping force of bolt.
Temperature resistance +80°C max.

Adjustable Clamping Levers with axial bearing - with grub screw

Clamping Levers

74482

Material

Lever: zinc die-cast, orange, similar to RAL 2004. Zinc die-cast, black, similar to RAL 9005.

Screw: stainless steel.

Inner parts: stainless steel.

Threaded part: stainless steel, hardened.

Technical Notes

Lifting the lever disengages the serrations

and the lever can be positioned. On releasing the lever the serrations are automatically re-engaged.

Tips

Benefits of axial bearing:

- clamping force is 100% greater than when using standard levers (see graph).
- smaller clamping levers can be used due to the improved clamping force.

- considerably less force loss due to setting.

- no releasing due to vibration.

- no damage to clamped parts, due to axial action.

Adjustable Clamping Levers

with axial bearing, from stainless steel, with screw

Clamping Levers

74860

Material

Plastic technopolymer (polyamide PA)
glass fibre reinforced, black.
Inner parts: steel, blackened embedded in
black plastic.

Tips

Unique Safety Handle.

**When not in use, the lever is not engaged
with threaded insert, i.e. the adjustable
lever turns freely.**

**As soon as the lever hub is pushed down,
both serrations will engage, allowing the
fixture to be released or clamped.**

After „releasing“, the lever disengages

through spring tension.

Important Notes

Used where accidental loosening or read-
justment can result in accidents.
Temperature resistant to +130°C.

Order No.	l_1	d_1	d_2	d_3	h_1	h_2	h_3	h_4 stroke	t min.	Weight g

Free Running Safety Star Grip

free-running when not engaged

Clamping Levers

70300

CLAMPING LEVERS

Material

Plastic technopolymer (Polyamide PA)
glass fibre reinforced, black.
Thread bush, steel.
Inner parts: zinc die cast.

dental loosening or adjusting of the knob
may lead to accidents.
Temperature resistant to +130°C.

Tips

Unique safety handle:
When not in use, star knob is not
engaged with the threaded insert, i.e.
the knob is free-running. Only after axial

pushing of the star knob, the two
serrations get engaged so that the knob
can be loosened/ tightened. After relea-
sing, the two serrations are disengaged
by a spring.

Technical Notes

Suitable for applications where an acci-

77300

Material

Aluminium mould casting. Plastic handle PF 31, DIN 7708.

Hub machined; rim turned and mirror-finished on all sides, non-machined surfaces cleanly blasted.

For corresponding handle details see no. 75120 rotating handle.

Technical Notes

The non-machined, raw surfaces are blasted; together with the mirror-polished

rim these handwheels are therefore showing a finish which in most cases does not require additional lacquering.

For keyways information (dim. t_1 and b_3) to DIN 6885.

Two Spoked Handwheels with fold-away rotating grip

77380

HANDWHEELS

Material

Duroplast, black. Zinc plated steel hub.
Fold-away revolving handle.

Technical Notes

The pilot hole allows various sizes of holes,
keyways etc. to be machined into the hub

upon request.

77010

Material

Standard: Duroplast, black. Zinc plated steel hub.

Reinforced: Duroplast with glass fibre

beads of increased strength, black zinc plated steel hub.

Technical Notes

The pilot hole allows various sizes of holes, keyways etc. to be machined into the boss.

Three Spoked Handwheels with rotating grip

77030

HANDWHEELS

Material

Standard: Duroplast, black. Zinc plated steel hub. Revolving handle.

Reinforced: Duroplast with glass fibre

beads for increased strength, black zinc plated steel auto-revolving handle.

Technical Notes

The pilot hole allows various sizes of holes, keyways etc. to be machined into the hub. Corresponding rotating handle 75100.

77100

Material

Handwheel: Grey cast iron GG.
Hub machined; rim turned and mirror-finished on all sides, non-machined

surfaces cleanly blasted.

Technical Notes

Produced to DIN 950.

There are gripping indentations on the rear sides.

For keyways information (dim. t_1 and b_3) to DIN 6885.

Aluminium Handwheels

77120

HANDWHEELS

Material

Aluminium, deburred. Hub machined, rim polished. For corresponding handle details

see no. 75060.

Technical Notes

Produced to DIN 950.

For keyways information (dim. t_1 and b_3) to DIN 6885.

77400

Material

Aluminium mould casting. Handle duroplast DF 31 black.

Hub machined; rim turned and mirror-finished on all sides, non-machined surfaces cleanly blasted.

For corresponding handle details see no. 75120 rotating handle.

Technical Notes

There are gripping indentations on the rear sides.

The non-machined, raw surfaces are blasted; together with the mirror-polished rim these handwheels are therefore showing a finish which in most cases does not require additional lacquering.

Temperature range up to 110°C. Also available in black plastic coated - on request.

For keyways information (dim. t_1 and b_3) to DIN 6885.
