

# Quick Plug Couplings with radial offset compensation

Couplings

64500

COUPLINGS

## Material

Body: steel, heat-treated, phosphated.  
Lock nut: steel, blackened (ISO 4035/  
8675).

## Technical Notes

For quick coupling/uncoupling of  
components within a linear movement  
application, with the additional advantage

of compensating for radial off-set between  
the components. In built adjustment  
feature of the quick plug coupling means  
manual adjustment of the coupled units is  
unnecessary. Coupling via means of a t-slot  
channel within the coupling nut.

## Tips

Can be linked to pneumatic and hydraulic

lifting cylinders in many different applica-  
tions.

**Important note: suitable for linear move-  
ment applications, does not transmit any  
torque.**

# Quick Plug Couplings

with radial offset compensation and screwed flange

## 64600

COUPLINGS

### Material

Body: steel, heat-treated, tempered, phosphated.

Lock nut: steel, blackened (ISO 4035/8675).

### Technical Notes

For quick coupling/uncoupling of components within a linear movement application, with the additional advantage

of compensating for radial off-set between the components. In built adjustment feature of the quick plug coupling means manual adjustment of the coupled units is unnecessary. Coupling via means of a t-slot channel within the coupling nut.

\*kN max is the maximum tensile and compression load.

### Tips

Ideal quick coupler where space is limited. Can be linked to pneumatic and hydraulic lifting cylinders in many different applications.

**Important note: suitable for linear movement applications, does not transmit any torque.**

# Quick Plug Couplings with angular radial offset compensation

**64700**

COUPLINGS

## Material

Body: steel, heat-treated, tempered, phosphated.

Nut: steel, heat-treated, phosphated.

Spring: stainless steel.

Coupling part: steel, heat-treated, nitrided, blackened.

Lock nut: steel, blackened (ISO 4035/8675).

## Technical Notes

Compensates for both radial off-set and

angular off-set between the components, making it ideal for applications with non-aligned linear components. Inbuilt adjustment feature of the quick plug coupling means manual adjustment of the coupled units is unnecessary. Coupling via means of a t-slot channel within the coupling nut.

## Tips

Solid and compact design, no loose elements. Can be linked to pneumatic and hydraulic lifting cylinders in many different

applications.

**Important note: suitable for linear movement applications, does not transmit any torque.**

## Quick Plug Couplings with angular radial offset compensation

COUPLINGS

**64775**

COUPLINGS

### Material

Body: steel S45C, nickel plated.  
Pin and Spring: stainless steel, SUS304

### Technical Notes

For quick coupling/uncoupling of components within a linear movement application. Coupling via means of a 90°C turn of coupling into the cam locking receiver. Please order receivers separately, see part nos. 64780 and 64782. Temperature resistant to 200 °C

### Tips

Can be linked to pneumatic and hydraulic

lifting cylinders in many different applications.

### Important Notes

**Suitable only for linear movement applications, does not transmit any torque.**

### Actuation:

- Following installation dimensions for both coupling and receiver in introductory pages.
- Once coupling and receiver are correctly installed, align male coupling to female receiver, paying attention to correctly

align pins on the coupling's shaft to holes in receiver.

- Engage coupling and receiver, to lock turn shaft or block 90 degrees to clamp.
- When properly locked an audible „click“ is heard.
- When properly installed, repeatability of upto +/- 0.08mm is achievable.
- To release, reverse steps described above.

Order No.	$d_1$ -0.04 -0.08	$d_2$ -0.04 -0.08	$d_3$	$h_1$	$h_2$	$l_1$	Shear strength N	Tensile strength N	Clamping force N max.	Weight g
64775.W0514	5	14	3	23.5	20	9.5	1800	1200	30	25

64780

Material

Body: tempered steel SCM440, nickel plated.

Technical Notes

Receiver for use with quick plug coupling,

cam locking no. 64775. Shaft mount version suited to installation on shafts; such as the end of pneumatic or hydraulic cylinders.  
Temperature resistant to 200° C

Important Notes

Suitable only for linear movement applications, does not transmit any torque.

Order No.	$d_1$ +0.08 -0.04	$d_2$ tol. h9	$d_3$	$h_1$	$h_2$	Weight g
64780.W0514	5	14	3	14.5	11	10

## Operating Principle

When the male quick plug coupling is fully inserted into the receiver and actuated, the internal spring is compressed to clamp the shaft.

## Operating Instructions

- 1 Insert the shaft into the keyway of cam receiver.
- 2 Rotate the shaft block 90° to clamp the element. An audible click can be heard when clamped. For unclamping, reverse these steps.

## Operating Dimensions

**How to mount shaft coupling clamp**

### How to mount receiver (shaft mount)

### How to mount receiver (plate mount)

### Repeatability

Prepare male and female fittings for highly accurate locating. Repeatability of  $\pm 0.08$  is achievable.

## Applications

### Changes of thrust pads

### Changes of riser

## Notes

Pay attention to the direction of holes for spring pins.

64782

Material

Body: tempered steel SCM440, nickel plated.

Technical Notes

Receiver for use with quick plug coupling,

cam locking no. 64775. Plate mount version suited to installation in thin walled parts, and sub-flush to the mounting surface.  
Temperature resistant to 200° C

Suitable only for linear movement applications, does not transmit any torque.

Order No.	$d_1$ +0.08 +0.04	$d_2$ tol. h9	$d_3$	$d_4$	$h_1$	$h_2$	$h_3$	$w_1$	$w_2$	$w_3$	Weight g
