Material

Body: steel, blackened.

Pin: steel, hardened and ground.

Grip: thermoplastic PA6, black.

Technical Notes

„**Locking**“ type- enable pin to be held in retracted position; pull back grip, turn 90° to engage ‚locking‘ on a notched catch.

„**Non Locking**“ type- pin simply springs

back when grip is released.

Due to extended length pin does not fully retreat into plunger body when grip activated - note dimension l_3 for length pin remains exposed.

Extended pin assists locating and indexing of components. Due to its extended length the pin does not fully retract flush to the plunger body - please note dimensions l_1

for extended pin length and l_3 for retracted pin length. Pin is toleranced to h7 for improved location accuracy. Accuracy dependant upon suitable tolerance of bush, we suggest H7, with min. pin engagement to dim. l_3 .

Tips

Grip non-removable.

Material

Free cutting Steel Type-

Body: free cutting steel, blackened.

Pin: steel, hardened.

Grip: thermoplastic PA6, black, dull.

Stainless Steel Type-

Body: stainless steel 1.4305 (AISI 303).

Pin: stainless steel 1.4305 (AISI 303), nickel plated.

Grip: thermoplastic PA6, black, dull.

Technical Notes

T-handle grip makes for improved hand-

ling, especially when operator is using safety gloves etc.

Thread recess on body allows full engagement of thread length. Hexagon collar improves leverage for secure installation.

„Locking“ type- enable pin to be held in retracted/non-projecting position; pull back grip, turn 90° to engage „locking“ on a notched catch.

Lock nuts sold separately. See products 65690 and 65692

Tips

Distance collars no. 32750 can be used to adapt screw length.

Grip non-removable.

Material

Body: steel zinc plated, blue passivated.
Pin: stainless steel 1.4305 (AISI 303).
Grip/Lever: thermoplastic, black.

Technical Notes

At start position locking pin is protruding, when lever is actuated locking pin retracts.

The lever can be turned anti-clockwise by 90° or 120°, over a cam guide, to retract

the pin.

Three different types available;

1) without rest position- sprung loaded pin which springs back to start position whenever released.

2) with rest position- pin held in retracted position via indexed notch on cam.

3) with safety rest position- pin held in retracted position via deep notch, to avoid

accidental actuation, lever must first be pulled out of notch prior to release.

Lock nuts sold separately. See products 65690 and 65692

Material

Pin, Body & Bush: case-hardened steel, blackened and ground.
Grip: thermoplastic, black.

Technical Notes

Supplied part assembled to enable precise setting, grip and body must be glued after

mounting. Non removable once installed.

„**Locking**“ type - enable pin to be held in retracted/non-projecting position; pull back grip, turn 90 to engage „locking“ on a notched catch.

„**Non Locking**“ type - pin simply springs

back when grip released.

Tips

When used for alignment of two sub-plates, the plunger's precise finish guarantees high repetition accuracy.

Index Plungers - Precision cylindrical pin

Index Plunger & Pins

INDEX PLUNGER & PINS

32480

Material

Pin, body & bush: case hardened steel, blackened and ground.
Grip: thermoplastic, black.

Technical Notes

Supplied part assembled to enable precise setting, grip and body must be glued after

mounting. Non removable once installed.

„Locking“ type - enable pin to be held in retracted/non-projecting position; pull back grip, turn 90° to engage „locking“ on a notched catch.

„Non Locking“ type - pin simply springs

back when grip released.

Tips

When used for alignment of two sub-plates, the plunger's precise finish on pin allows easier alignment of pin and bushing.

Spring loads * = statistical average.
