PEEK FASTENERS

### Material

Polyether Ether Ketone (PEEK) is a high performance engineering plastic, known for its durability and chemical resistance. It has excellent dimensional stability and a maximum operating temperature of 260°C. Natural PEEK is used in this range which is light brown in colour.

### Technical Notes

PEEK is used in the aerospace and petro-

chemical industries. For food and pharmaceutical industries we can offer these products in a compound that is FDA compliant, as well as highly optically and metal detectable.

Manufactured for industries with a hygienic requirement, these products are made with an X-Ray opaque or metal detectable filler, in blue, for optical detection. For medical

industry applications, we can offer these products in a variant of PEEK which is refined for biocompatibility. Natural PEEK is used in the aerospace and chemical industries.
